DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: spelling errors and inconsistent terminology.

Claim 1 line 3 should read, "a stator installed on an inner side of the outer case".

Claim 1 line 5 should read "the stator having an annular shape".

Claim 1 line 11 should read "the third shafts so as to be coaxial with the first and the second armature"

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim1 rejected under 35 U.S.C. 102(b) as being anticipated by Kofink (DE 2906404).

Kofink discloses an linear/rotary actuator in fig.1 comprising: an outer case (1), stator (7) at the inner side of the case, a first and second armature coils parts (8,8a), the first armature coil part of the stator (8) having an annual shape complementarily fittable with in the outer case, and the second armature (8a) coil part of the stator being assembled in the outer case in a perpendicular direction to the first armature coil part; a rotor (6)

including a first (A), second (B) and third shaft(C) wherein, the second shaft forms a predetermined interval between the first and third shafts to be coaxial with the first and the second armature coil parts of the stator. Kofink also discloses, a first permanent magnet (6) rotor part having a plurality of cylindrically shaped permanents (12) arranged on the first shaft for linear movement of the rotor; and a second permanent magnet (5) rotor part having a plurality of elongated permanent (10) assembled coaxially along and around an outer circumferential surface of the third shaft, for rotation of the rotor.

Response to Arguments

1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

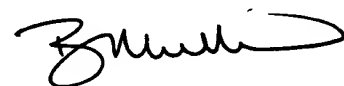

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
